THE FULL INSTITUTIONAL DECISION STACK

Insight, data and expertise – in one workspace.

Real-time insight
Independent, provider-sourced research and market-moving news, streamed the moment it publishes – with a deep edge in special situations, index events and ECM.
[Learn more →](#)

Specialist alternative data
Proprietary and premium datasets – flow, credit, point-of-sale, commodities, satellite – for systematic and fundamental desks alike.
[Learn more →](#)

On-demand analyst access
Follow, message and commission the independent analysts behind the research – always-on expertise, not one-off, MNPI-risk calls.
[Learn more →](#)

Slide 2. Institutional Decision Making is changing: no change

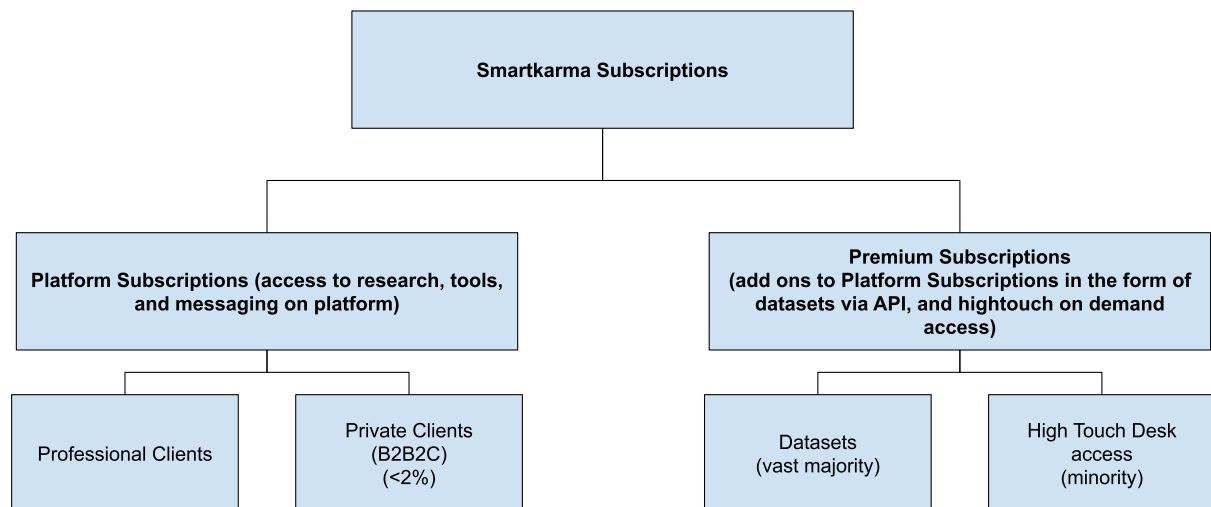

Slide 3 => Update to be more like our 1-pager
/Users/raghavkapoor/claudeprojects/skonepager (i.e. key highlights) => Remove revenue number - use some points here as well.

Financial and shareholder profile	
Recurring revenue (2026E)	\$10M+
Growth	25–30% per year
Profitability	Profitable, ~10% net
Cash	~\$6M, no debt
Data subscription revenue (2026E)	50%+
Data as % of new sales	~65%
Inbound revenue	60%+
Team	~25 (~20 Singapore)
Shareholders	SGX (~7%), Sequoia

Slide 4. Revise this slide to showcase this.

Title: Business Model

Subtitle: From Platform Subscriptions to Premium Subscriptions, supporting a land and expand strategy

Subscription Tier	Description	Headline Price	Contract Terms	Gross Margins
Platform Subscription	Real time Insight from 300+ curated sources, data tools and engagement features under a single streaming subscription with a focus on differentiated verticals: Event-Driven, Index Rebalance, ECM, Forensic Accounting and more.	USD10950/ user	Annual, in advance	30%+
Premium Subscription	Specialist alternative Data Subscriptions and High-Touch analyst desk access — sold per-team, per dataset basis	US\$35k-200k per data set, per team	Annual, in advance	30-90%

Slide 5, 6, 7, 8, 9. No Change

Slide 10: Bring out the “specialist nature” more, the “on-demand” nature more, the focus on “small and mid-caps” the Asia-first, and also the growing focus on private markets here (refer slide xx below also) / borrow from /tools/coverage and also highlighting Areas of expertise <https://skweb2026-staging.smartkarma.com/tools/coverage/expertise/> - make it stats driven

Replace Slide 11. Main message AI is a Tailwind / Accelerator

1. We view AI as a force multiplier, not a disruptor, to our business.

Foundation models are becoming increasingly powerful, but models alone are not the moat. The scarce asset is the proprietary data, differentiated content, expert judgement, and workflow context that those models are grounded on.

As AI drives the marginal cost of information towards zero, the value shifts upstream to unique inputs and downstream to workflow integration. Investors are not paying for summaries. They are paying for differentiated signals, proprietary datasets, expert perspectives, and faster decision-making.

Our defensibility over the next 2-3 years rests on four areas:

- 1) Proprietary Grounding: A decade of structured investment intelligence, alternative datasets, private market research, and user interaction data that is not available in public training sets.
- 2) Intelligence Network: Hundreds of specialists generating original forecasts, event-driven analysis, and domain expertise that AI can amplify but not easily replace.
- 3) Workflow Ownership: Deep integration into institutional research and investment workflows, where switching costs are measured in process change and trust, not subscription fees.
- 4) Application Layer AI: our agentic workflows sit above the foundation models, combining the best available AI with proprietary content and investment-specific workflows. We believe significant value will accrue at this application layer.

Recent fund raise participation from one of the world's fastest-growing quantitative hedge funds and a leader in AI-driven investing, alongside Singapore Exchange, a leading multi-asset exchange, reinforces this view. The most sophisticated AI users are not moving away from proprietary content and data. They are seeking more of it.

Our core thesis is simple: foundation models will become increasingly abundant. Proprietary data, trusted expert networks, and workflow-specific intelligence will not. Those are the assets Smartkarma has been building for over a decade.

Agentic Feature tie in from the AI-AUGEMENTED section in skweb20206 feature gallery /feature-gallery (show examples)

Slide 12 Focus on Specialist Datasets (Premium Subscriptions) - categorise / show / point to tier 1 client logos (such as in current slide 12), also talk about MCP /home/smartwealth in skweb2026

Data subscription revenue (2026E)	50%+
Data as % of new sales	~65%
